IPSECME WG
IETF 72, Dublin

Yaron Sheffer

Paul Hoffman

Charter review

- Approved July 3, 2008
- Fixed deliverables
- First step: get the documents going
- The charter is good for 24 months
  - Recharter or shut down

What is in and out of scope

- The charter is a fairly strict guide
- Out-of-scope drafts can be announced on the WG mailing list
  - Extended discussions should have their own mailing lists
- Yaron and Paul are responsible to Pasi to keep the WG on track

When new things can be added to the charter

- Sometime next year, after we finish our first work item

- "Finish" means completes IESG review

- At that time, the group can negotiate new work items with the ADs

- No need to think about it now

Rest of meeting

- IKEv2bis status
- Roadmap document
- IKEv2 IPv6 config status
- IKE session resumption status
- IKE redirect status
- ESP-null visibility
- Out-of-scope-for-the-WG documents
- Open mic on items from the charter
- Open mic on non-charter items
- Wrap-up
