IPsec Roadmap

Yaron Sheffer and
Paul Hoffman

IETF-72

Chartered Work Item

- An IPsec Roadmap document
- Covering the main specifications, extensions and algorithm documents
- Both 24XX and 43XX documents
- More general than RFC 2411
  - Which is focused on the "recommended content of algorithm documents"
- Informational!

- **Main motivation: serve as a guide to implementors**

Food for Thought

- LDAPv3: RFC 4510
- TCP: RFC 4614
- BGP: RFC 1656
  - Minus the implementation sections
- draft-ietf-pkix-roadmap
  - Expired, probably too deep on rationale and WG history
- draft-ietf-sip-hitchhikers-guide

Status

- Volunteers are eagerly solicited!
