RMT Security Discussion
draft-ietf-rmt-sec-discussion-02

IETF 72 – Dublin, July 2008

Brian Adamson/ Vincent Roca

draft-ietf-rmt-sec-discussion-02

- Modest revisions from version 01
  - Editorial
  - Clarifications based on comments from readers
  - Simple "Security Infrastructure" section that principally refers to MSEC WG work
- No significant TBDs remain
  - Another round of editorial review needed (some typos, etc are noted)

- Wider review should be encouraged!

What do we do with it?

- Document contains broad discussion of security considerations applicable to RMT protocol suite
- Publish as informational for non-normative reference purposes?
  - As opposed as being normative security guidance
- If submitted for publication in time (soon!), it could be referenced by the RMT PI documents?
