A Protocol for Provisioning Resource Certificates

draft-ietf-sidr-rescerts-provisioning-02.txt

Summary

This document defines a framework for certificate management interactions between a resource issuer and a resource recipient by means of a protocol for interaction between the two parties.

Updates

- Changes since -00 version (Jan 08)
  - Added complete CMS profile for XML wrapper
  - The CMS wrapper MUST contain the signing EE certificate (sec 3.1.1.4) and CRL (sec 3.1.1.5)
  - The CMS wrapper MUST include the content-type and signing-time signed attributes (sec 3.1.1.6.4)
  - Security Considerations (sec 5)

To Do

- Update Security Considerations
- Are we then done?
