

# **Considerations of Using Unique Local Addresses**

(draft-ietf-v6ops-ula-usage-recommendations-04)

***Bing Liu, Sheng Jiang***

*IETF 91@Honolulu, Nov 2014*

# Discussion in last IETF

- Main concerns
  - Language issues
  - RFC2119 key words issue (mostly regarding to “SHOULD” “MUST”)
- The new 04 version
  - Tom Taylor did a language check and revision through the whole document (Many thanks to Tom!)
  - The key words were cleared
    - Unless one “MUST” and one “MUST NOT” which are actually a quoting to [RFC7084]
