Abstract

This memo updates the IANA registry rules for the Telephony Routing over IP (TRIP) protocol, by no longer requiring that postal addresses be included in contact information.

This memo updates RFC 3219.

Status of This Memo

This Internet-Draft is submitted in full conformance with the provisions of BCP 78 and BCP 79.

Internet-Drafts are working documents of the Internet Engineering Task Force (IETF). Note that other groups may also distribute working documents as Internet-Drafts. The list of current Internet-Drafts is at http://datatracker.ietf.org/drafts/current/.

Internet-Drafts are draft documents valid for a maximum of six months and may be updated, replaced, or obsoleted by other documents at any time. It is inappropriate to use Internet-Drafts as reference material or to cite them other than as "work in progress."

This Internet-Draft will expire on June 7, 2019.

This memo updates the IANA registry rules for the Telephony Routing over IP (TRIP) protocol, by no longer requiring that postal addresses be included in contact information. No use for the addresses is identified, and omitting this information provides a privacy benefit.

This memo updates RFC 3219.

2. IANA Considerations

This memo updates the registration rules [RFC8126] for TRIP Attributes ([RFC3219], Section 13.2) and TRIP ITAD Numbers ([RFC3219], Section 13.5) as follows.

IANA will no longer collect postal address information when adding TRIP registry entries. Additionally, IANA should no longer publish previously collected postal addresses.

3. Security Considerations

No security impacts of this change have been identified.

4. Acknowledgements

The authors would like to thank Michelle Cotton, Alissa Cooper, and Jonathan Rosenberg for interesting discussions in this problem space. The authors would also like to thank Carlos Pignataro, Russ Housley, Abdussalam Baryun, and Paul Wouters for feedback.

5. Normative References
