A Yang Data Model for WSON Tunnel

draft-ietf-ccamp-wson-tunnel-model-03

Abstract

This document provides a YANG data model for WSON TE tunnel.

Status of this Memo

This Internet-Draft is submitted to IETF in full conformance with
the provisions of BCP 78 and BCP 79.

Internet-Drafts are working documents of the Internet Engineering
Task Force (IETF), its areas, and its working groups. Note that
other groups may also distribute working documents as Internet-
Drafts.

Internet-Drafts are draft documents valid for a maximum of six
months and may be updated, replaced, or obsoleted by other documents
at any time. It is inappropriate to use Internet-Drafts as
reference material or to cite them other than as "work in progress."

The list of current Internet-Drafts can be accessed at
http://www.ietf.org/ietf/1id-abstracts.txt

The list of Internet-Draft Shadow Directories can be accessed at
http://www.ietf.org/shadow.html

This Internet-Draft will expire on September 7, 2019.
1. Introduction

This document provides a YANG data model for WSON tunnel model. The YANG model described in this document is a WSON technology-specific Yang Tunnel model based on the information model developed in [RFC7446] and the two encoding documents [RFC7581] and [RFC7579] that developed protocol independent encodings based on [RFC7446].

This document augments the generic TE tunnel model [TE-Tunnel].
1.1. Terminology

Refer to [RFC7446] and [RFC7581] for the key terms used in this document.

The following terms are defined in [RFC7950] and are not redefined here:

- client
- server
- augment
- data model
- data node

The following terms are defined in [RFC6241] and are not redefined here:

- configuration data
- state data

The terminology for describing YANG data models is found in [RFC7950].

1.2. Tree diagram

A simplified graphical representation of the data model is used in chapter 2 of this document. The meaning of the symbols in these diagrams is defined in [RFC8340].

1.3. Prefixes in Data Node Names

In this document, names of data nodes and other data model objects are prefixed using the standard prefix associated with the corresponding YANG imported modules, as shown in Table 1.

<p>| Prefix      | YANG module               | Reference       |
|-------------+--------------------------+-----------------|
| layer0-types| ietf-layer0-types        | [WSON-TOPO]     |
| wson-tunnel | ietf-wson-tunnel         | [RFCXXXX]       |
| tepc        | ietf-te-path-computation | [TE-PC]         |
| te          | ietf-te                  | [TE-Tunnel]     |</p>
<table>
<thead>
<tr>
<th>otn-types</th>
<th>ietf-otn-types</th>
<th>[OTN-TOPO]</th>
</tr>
</thead>
</table>
| +-------------+--------------------------+-----------------+
| Table 1: Prefixes and corresponding YANG modules

Note: The RFC Editor will replace XXXX with the number assigned to the RFC once this draft becomes an RFC.

4. Security Considerations

The configuration, state, and action data defined in this document
are designed to be accessed via a management protocol with a secure
transport layer, such as NETCONF [RFC6241]. The NETCONF access
control model [RFC8341] provides the means to restrict access for
particular NETCONF users to a preconfigured subset of all available
NETCONF protocol operations and content.

A number of configuration data nodes defined in this document are
writable/deletable (i.e., "config true") These data nodes may be
considered sensitive or vulnerable in some network environments.
5. IANA Considerations

This document registers the following namespace URIs in the IETF XML registry [RFC3688]:

 **************************************************************************
Registrant Contact: The IESG.
XML: N/A, the requested URI is an XML namespace.
 **************************************************************************

This document registers the following YANG modules in the YANG Module Name registry [RFC7950]:

 **************************************************************************
name: ietf-wson-tunnel
reference: RFC XXXX (TDB)
 **************************************************************************
