Expert Review for Incident Object Description Exchange Format (IODEF)
Extensions in IANA XML Registry

Abstract

This document specifies restrictions on additions to the subset of the IANA XML Namespace and Schema registries, to require Expert Review for extensions to Incident Object Description Exchange Format (IODEF).

Status of This Memo

This is an Internet Standards Track document.

IODEF XML Registry

1. Introduction

IODEF extensions via class extension through AdditionalData and RecordItem elements, per Section 5.2 of [RFC5070], generally register their namespaces and schemas with the IANA XML Namespace registry at http://www.iana.org/assignments/xml-registry/ns.html and the IANA XML Schema registry at http://www.iana.org/assignments/xml-registry/schema.html, respectively [RFC3688].

In addition to schema reviews required by IANA, these registry requests should be accompanied by a review by IODEF experts to ensure the specified AdditionalData and/or RecordItem contents are compatible with IODEF and with other existing IODEF extensions. This document specifies that review.

2. Expert Review of IODEF-Related XML Registry Entries

The IODEF expert(s) for these reviews will be designated by the IETF Security Area Directors.

3. Security Considerations

This document has no security considerations.

4. IANA Considerations

This document specifies additional expert reviews for IODEF extensions, on the XML Schema registry (http://www.iana.org/assignments/xml-registry/schema.html), in Section 2.
